**INSPECTION REPORT**

**STATE OF MINNESOTA  
MINNESOTA ZOOLOGICAL GARDEN**

**Customer ID:** 2793

**Certificate:** 41-C-0019

**Site:** 001

**MINNESOTA ZOOLOGICAL**

**13000 ZOO BOULEVARD  
APPLE VALLEY, MN 55124**

**Inspection  
Type:** ROUTINE INSPECTION

**Date:** OCT-02-2003

**3.125 ( c )**

**FACILITIES, GENERAL.**

STORAGE - Food and bedding supplies must be stored in facilities which adequately protect such supplies. The food and bedding for the hooded rats in the Bird Show area are stored in the closet with the cleaning chemicals. The food and bedding could be contaminated if the chemicals spilled on them which if they are used, could affect the health and well-being of the animals. Food and bedding must be stored separately from the cleaning supplies. Correct by 10/10/03. 13 animals affected.

**3.130**

**WATERING.**

All water receptacles must be kept clean and sanitary. The water tank in the Przewalski's horse pasture by the bison holding pens has rusted along the inside surfaces which does not allow it to be properly cleaned and sanitized. Water receptacles must be able to be properly cleaned and sanitized to protect the health and well-being of the animals. The water receptacles must be repaired or replaced. Correct by 10/31/03. 3 animals affected.

NOTE: PEQ INSPECTION WAS ALSO CONDUCTED AT THIS INSPECTION.

LAST INSPECTION: 12/17/02

Inspection of animals conducted with multiple zoo keepers on September 29, 2003

Records review conducted with (b)(6), (b)(7)c and exit interview conducted with (b)(6), (b)(7)c

(b)(6), (b)(7)c on October 2, 2003.

**INVENTORY:**
